Next Experience Unified Navigation Activity

Simulator Task

INSTANCE STATUS		**Your instance will expire in...**	**SIMULATOR SCORE**
Running		14 Days 10 Hours 47 Minutes	20% passed
Terminate Instance	**Open My Instance**	Request Expiry Extension	

Task Result: *Success*   Task validation successful!

Get Started with Next Experience Unified Navigation

1. Log into the Simulator instance and quickly identify what you can access by using the shortcut you learned earlier to collapse all applications. Notice you can access many applications based on the admin role you have been assigned.

2. Now, **impersonate *Abel Tuter*** *and c*ollapse all the applications using the same shortcut. Notice the difference in role-based security compared to yours.

3. While impersonating *Abel Tuter*, create a **Favorite** for the **Change Password** module. Set the Color to ***purple*** and the Icon to a ***key***.

4. End impersonation to switch back to **your user**. Look at your **Favorites**. Is the **Change Password** favorite you created as **Abel Tuter** here? Should it be?

Upon completion of these tasks, select the **Validate Task** button. If the validation fails, refer to the recommendations for hints.

If you continue to have difficulties completing the activity, you can find additional hints by going to your Simulator Instance and navigating to the **Simulator Task Information > Next Experience Unified Navigation Activity** module.
